Your partner for all your Wooden floor
and Laminate floor requirements

ZENITH

Laminate Flooring

There is only one way, and that is the right way;
nothing else is good enough.

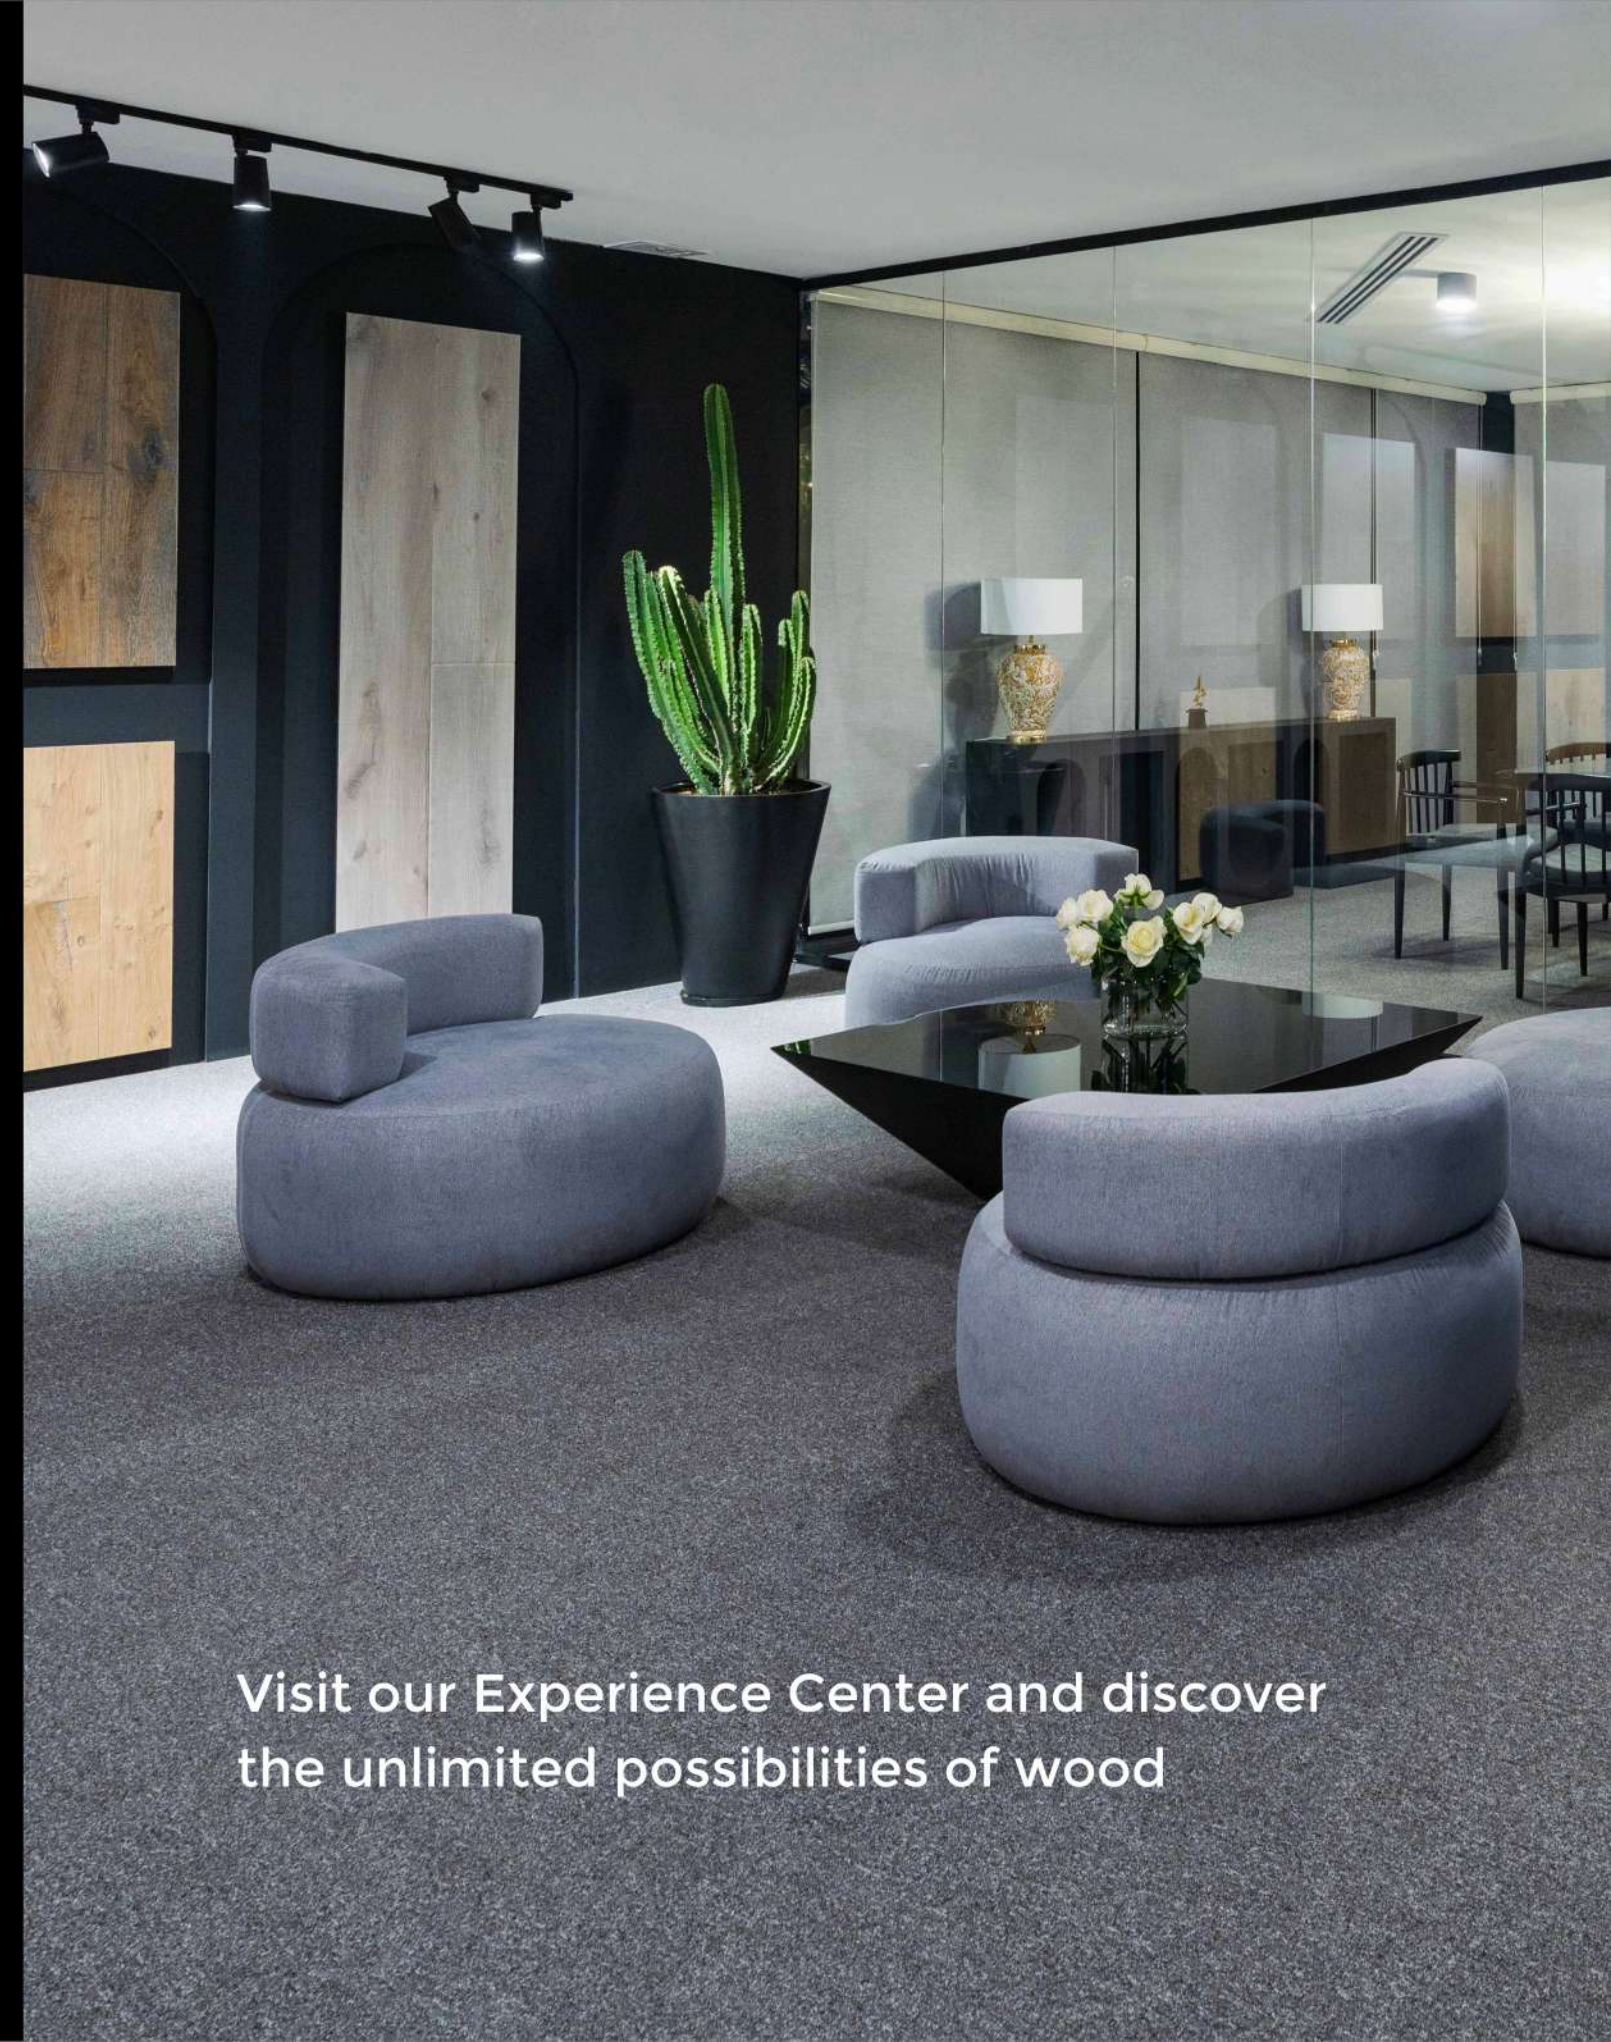

About ZENITH

Zenith, joint product of ZHIVAR company and its business partner Zenith Russia, consists of quality raw materials from the most reputable foreign companies, art and creativity of the world's top designers and a professional technical and support team that is able to compete with the best products of European companies and platforms provide export of these products. This complex, with its high capacity and variety of production, is a suitable platform for meeting the needs of consumers and satisfying customers.

Zenith factories will create the highest quality and most special products for you by using experienced and expert engineers and skilled technical staff in the production unit. Also, using an expert and efficient team in the departments of production, commerce, design, accounting, human resources, administration, support and procurement is one of the basic policies and among the main factors of our special growth.

Featers

Zenit Laminate Parquet, a joint product of Zhivar Trading Manufacturing Company and Russian Zenit Company, is produced and supplied in three collections, Prestige, Nature and Alliance, using high-quality foreign raw materials and relying on the art of the world's best designers and the ability of a professional technical team.

They give a unique effect to residential, office and commercial spaces. Unique beauty, water resistance, impact resistance and scratch resistance in dimensions, natural elevation of the parquet surface are among the main features of Zenith products.

— Water resistance

The only importer of quality HDFs from Chamson Türkiye Laminates made with HDF have the highest resistance and the lowest amount of water absorption in tiles, which increases the useful life of the flooring effectively. Based on this, Zenit products have the ability to be among the compatible and long-lasting laminates in cities with high humidity and humid environments.

— Ac5 standard

Zenith Laminate Parquet has the highest manufacturing standard, and for this reason, they are among the most resistant laminates in the world against wear and scratches; This feature makes Zenit laminates the most suitable choice for office, commercial and home use.

— Deep-U Groove click structure

The click structure of Zenith laminate parquet, in addition to protection against water and dust penetration, makes the installation process very easy. Because you can install your flooring in the shortest time and simply anywhere with the click system.

The way Zenith laminates are clicked is Deep-U style, unlike the models in the market that are mostly V-style; which prevents damage caused by getting mass, getting stuck on the shoe heel or sofa base, etc.

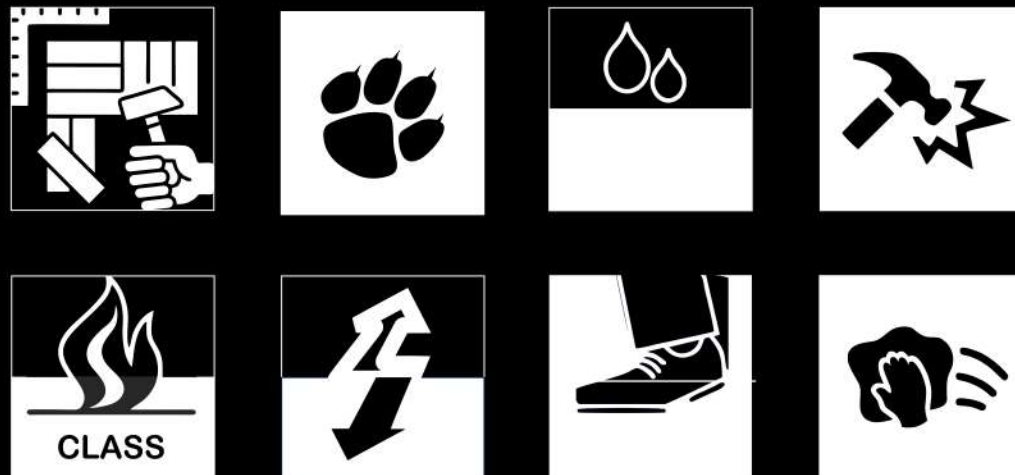

— Special and large dimensions

The only manufacturer of laminate parquet with a thickness of 12 mm in IranSolid and thick appearance, more beautiful effect, natural appearance of wood design, easier installation and... One of the most important and widely used advantages of Zenith laminate parquet is its large size.

This feature gives the product a special thick appearance and the naturalness of the wood can be seen. The dimensions of Zenith laminate parquet are 240 x 40 cm.

— Prominence of procedural level designs

The production process of Zenith parquet laminates uses the latest manufacturing techniques to create beautiful ridges similar to the real texture of wood to induce a real and pleasant feeling of natural wood.
